Nikole,

If Cochiti wants to come in for the base amount of \$65,000 I think that would be fine, even if the application is late.

Thanks!

Samuel Reynolds, Project Officer

Nicole,

Could you please contact Cochiti, per our conversation of them applying for 106 this year. I'm asking you to contact them based on their tribe being in your jurisdiction, and you potentially being their project officer. Their contact info is listed below.

Thanks!

George,

We here at Cochiti DNRC have been making positive steps in following up on the topic of Cochiti Pueblo's TAS status for the purpose of the Clean Water Act Section 106 program.

We understand that some time has elapse on this topic with Cochiti, whereas we are determined to pursue this avenue persevering through adversity.

We have been in contact with Jason W. Howard and Scott Riley, and currently would like to request your assistance on prospective grant application process for Cochiti Pueblo.

At your convenience, I'd like to request a conference call with you, Jason and Scott to determine the best path to move forward in Cochiti's pursuit on the Clean Water Act Section 106 program.

We here at Cochiti DNRC greatly appreciate any assistance that you can afford us.

Look forward to hearing from you,
